Proof of adequate statistical safety for issuing an inspection certificate 3.1 according to AD 2000 Merkblatt W 4 (edition 04/2026) for the materials P355N, P355NH (EN 10216-3) and 16Mo3 (EN 10216-2) with wall thicknesses ≤ 30 mm

Dear Sir or Madam,

we hereby confirm that the company INTERPIPE ROMAN S.A. has demonstrated by statistical evaluation, that the mechanical and chemical properties of seamless pipes in material P355N, P355NH (EN 10216-3) and 16Mo3 (EN 10216-2) are met with adequate safety.

Therefore, INTERPIPE ROMAN S.A. is entitled to issue inspection certificate 3.1 instead of inspection certificate 3.2 for seamless pipes in material P355N, P355NH and 16Mo3 with wall thicknesses ≤ 30 mm.

The 3.1 inspection certificate for such deliveries shall contain the following remark:

“The changeover to an inspection certificate 3.1 is confirmed in letter of TÜV SÜD Industrie Service GmbH dated 2026-06-30.”

Kind regards

M. Eng. Stephan Loibl
